
Intelligent Lighting Systems

Manage lighting in your house, barn or skyscraper!

Central control for your home or skyscraper

- Easy control of all lighting
- Effortless extensibility
- Architecture that scales

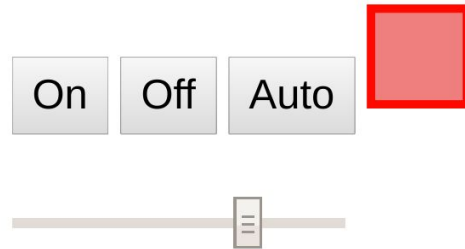

User interface

Smart house

User interface

Smart house

Architecture

- RESTful interface
- Single page application
- Mobile and desktop

Benefits

- Lower costs
 - Manual labour
 - Electricity
 - Maintenance
- Easy maintainability
- Peace of mind for everyone

MVP implementation

- Web interface
 - Not very beautiful or responsive
 - It works though :)
 - Backend
 - Clean RESTful API fully implemented
 - Easy access for external partners
 - Physical device
 - Two switches, one light (simulated by a LED)
 - Manual switches override remote settings
 - (But don't necessarily block them)
-
